

Remarks

In response to the restriction requirement, Applicants elect Group I, claims 19-21.

In response to the election of species requirement as it pertains to a Group I election, Applicants elect the following species: (ii) for a single disclosed combination of two, three or more active compounds and the specific combination of donepezil and Chloromazine.

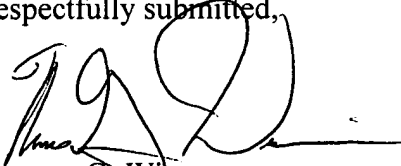

Both election of Group I and the election of the species is with traverse. The specifics of particular application of any one of criteria (a)-(e) to the instant fact pattern is not set forth with any particularity. The process of Group II is but a mere use of the elected combination of Group I. The method, according to the specification, is directed to "treating", i.e., eliminating and/or alleviating one or more symptoms of dementia and/or cognitive impairments. The undue burden on the Office is not apparent on its face.

Withdrawal of the requirement is respectfully requested.

Summary

An early and favorable consideration of the claims of Group I and the elected species is respectfully requested.

Respectfully submitted,
